**Project Title:** Learning Path Creator

**Completion date:**

# Table of Contents

## Contents

# Introduction

Briefly describe the purpose and functionality of the application.

# Setup and Installation

Provide step-by-step instructions on how to set up and run the application.

# Application Architecture

Describe the overall architecture of the application, including any frameworks or libraries used.

# User Authentication and Authorization

Detail how user authentication and authorization are handled in the application.
Include a few usernames and passwords.

# Database Interaction

Explain what method your application uses to interact with the database. Insert the picture of your database schema.

# Database Queries

Please include all the queries (with a short comment about where it is used) you used within your project.

# Server-side scripting (PHP)

Describe how server-side scripting is handled in the application and highlight any particular PHP functionalities used.

# Responsive User Interface

Explain how responsiveness is achieved in the application's user interface.

# Error Handling and Validation

Detail the error handling and validation mechanisms in place throughout the application.

# Documentation and Code Quality

Discuss the measures taken to ensure code quality and provide additional documentation if necessary.

# Project-Specific Functionality (Innovative Feature)

List and describe all the project-specific functionalities implemented in the application.

# Additional Notes

Include any additional information or notes that might help the reader to understand or use the application.

# Team Member Information and Contributions

Provide contact information for all group members, including names, student IDs, email addresses, URL to presentation video and URL project folder on member's GBLearn account.
